# Coming 2020! New Terminal And Carnival's Largest Ship

*This new cruise vessel, the largest ever built by Carnival Cruise Line, will be a state-of-the-art ship engineered on the LNG "green cruising" design platform, the first LNG-powered cruise ship based in North America.*

Rendering of Terminal CT3  
and largest Carnival ship

## Terminal CT3

Beautifully designed for passenger convenience

CT3, a modern two-story 185,000 sq.ft. terminal, will be home to a new ship — Carnival Cruise Line's largest ship at 180,000 tons (first sailing 2020) — with a 5,286 lower berth capacity and a maximum capacity of approximately 6,500 guests.

The new CT-3 terminal, plus an adjacent elevated parking facility to accommodate nearly 1,800 vehicles, and related wharf, road and access improvements will total \$150 million — estimated to be the largest single project in the history of the Port. CT3 is planned for completion by June 2020.
